

ECODOME MAROC

One line pitch:

Ecodome Maroc is an entreprise that designs and builds eco-touristic constructions in shape of domes using rammed earth.

Market Analysis:

We are targeting two niches: - Individuals who own farms and want to establish secondary ecological houses in it: currently, most of them are retired or going to be retired in few years. - Investors in eco-tourism: they invest in creating infrastructure to receive tourists in rural areas with high natural potential.

Value proposition:

The concept of Ecodome proposes many advantages: - Natural thermal and sound insulation: this enables reducing the energy consumption of the building - Reducing the time of construction up to 50% compared to concrete buildings. - Reducing the cost of the construction up to 40% - Bringing a huge flexibility in designs

Business Model:

We make profit from two main activities: -Technical and architectural studies -The service of construction

IP and Regulatory situation:

We are currently working according to RCPT document (Reglement of Parasismic Construction using Earth) that gathers different regulatory norms to follow in order to build an earthen construction.
