

EPIPERT

One line pitch:

Epilert is a wearable device that detects and Monitor epilepsy seizures, also it send instant alers to Doctors and Parents in case of seizures.

Market Analysis:

The Market of Epilepsy seizures is pretty tight , we have one direct compatitor called empatica , it's a bracelet that offers the same services , however ours are more efficients (testing percentage) and we are targeting a wider customer selection .

Value proposition:

We offer a wider options than our competitor. Epilert's technology can detect seizures before occuring , Notify parents with location , send immiadte doctor diagnostis and Contact caregivers if the seizures reaches a critical level . We are working on making this technology compatible on Apple watch, Samsung Gear , Fitbit , Garmin .

Business Model:

Our Business Concepts of Building this product is to raise an amount of 100000 \$ to focus on Marekting and increase the product quality . 1-We will be generating the profit by selling the technology to Big industries to be used in their hardware materials 2- Selling the bracelet through our E-Commerce Channels 3- Get a Inssurance accreditation (product to be refunded by insurances if its written in a doctor's note)

IP and Regulatory situation:

Currently working on our Patents , We expecting to register it by the 3rd week of November in the INORPI Tunisia.
